

# trac

Integrated SCM & Project Management

**<http://trac.edgewall.org/>**

## **SANOG 10 Workshop**

**August 29-Sep 2 – New Delhi, India**

Hervey Allen

# What's it Do?

## Software Configuration Management

- wiki for collaboration
- Interface to subversion for change management.
- Timeline for milestones, progress reports, etc.
- Ticketing system
- Integration with email

# Installation

**We'll create a fairly complex trac project...**

- Multiple trac environment configuration.
- Authentication via trac not Apache.
- trac user admin via web interface.
- write-protected for anonymous users.
- Ability to add subversion later.
- Aztech calendar plug-in.

# trac: Some Details

- **Let's look at the wiki...**
- **Let's look at the ticketing system...**
- **Let's look at different user views...**

# trac install and post install

**Let's do the following:**

**1.) Install**

**2.) Review the install**

**3.) If time, do a few more exercises:**

- **Add “TICKET\_VEW” to the *anonymous* user profile.**
- **Find a plugin you want and install.**
