Structure of DSpace

- Communities
  - Sub-communities (optional)
    - **Collections**
      - Titles
        - » Files
  - **Collections**
   - Titles
      - Files

- Collections are required to add items!

- Terms can be localized for your needs:
  - For example:
    - Community = Dépôt
    - Collection = Thème
  - Change terms in messages.xml file

Top-level Organization: Communities

- "Top-level" communities are displayed on the home page

Further thematic or grouping categorization: sub-communities

- When more organizational structure is desired, sub-communities can be used. The nomenclature is a little misleading, because they're all still just communities.

- The following example from Scholars' Bank illustrates sub-communities within the "University Archives" community

UO Libraries

↔ Scholars' Bank Home   ↔ University Archives

Welcome to the University Archives electronic records community. The University Archives community in Scholars' Bank is for university records in digital form. The material contained in Scholars' Bank represents a small portion of the institutional records housed in University Archives. If you are interested in other historic or contemporary records not seen here, please contact Special Collections and University Archives at spcarref@uoregon.edu or 541-346-3068. If you have questions about materials here please contact the Electronic Records Archivist at khomo@uoregon.edu or 541-346-2487.

Submission Policy

Please coordinate with the Electronic Records Archivist before submitting materials into the University Archives community in Scholars' Bank. Records are accepted based on the University Archives collecting policy. For more information about depositing digital materials into Scholars' Bank, please contact the University Archivist.

Where Items Go: the "Collection"

- A DSpace collection is a group of items that are grouped together

- In a collection, you can determine:

  - Who can submit to a collection

  - The review process

  - Who is allowed to see the collection

  - The input-forms for a collection

The Renaissance Academies between Science and the Humanities

Show full item record

Title: The Renaissance Academies between Science and the Humanities

Author: McNeely, Ian F.

Abstract: A synthetic analysis of the academies of the Renaissance and early modern periods, emphasizing their importance as an alternative to the European university and as a bridge between the "two cultures" of science and the humanities.

Northern Goshawks in the Malheur National Forest Eastern Oregon 1992 TO 2011

Show full item record

Title: Northern Goshawks in the Malheur National Forest Eastern Oregon 1992 TO 2011

Author: Rickabaugh, Skylar J.; Fremd, Theodore J.

Abstract: This report summarizes the data generated from a long-term effort to perform continued and consistent monitoring of goshawk nest sites on the Malheur National Forest in eastern Oregon from 1992 to 2010. This compilation is the product of personal field work in which data were collected in a manner that was consistent with the methods developed in 1992, the first year in which attempts to quantify variables in territory usage, habitat selection, yearly productivity, and other behavioral attributes of Northern Goshawk (Accipiter gentilis) began in the drier eastern forests of Oregon. The contents of this manuscript consist of a narrative of the history of studies and methods as envisioned by researchers from Oregon State University and various public land management agencies, and the yearly field observations subsequently carried out by the author. This information includes the tracking of movement, productivity, and yearly occurrences of goshawk in their territories, along with other observations and studies that were added by the author. Rather than viewing this as an attempt to test hypotheses, this is a presentation of a long– term monitoring project, in the mold of classic natural history observations. This manuscript contains specific data and information from insights that hopefully will be gleaned to aid further investigations in this region of eastern Oregon, and may be of interest elsewhere.
