# 1    pfSense hands on

There are some filter rules we can implement on our firewall:

https://nsrc.org/workshops/2013/pacnog14-sns/raw-attachment/wiki/Agenda/Firewalls.pdf

We also want to be able to connect to these ports on srvX.ws.nsrc.org from outside:

```
ssh - port 22
```

## 1.1    We need to lock down the web interface and turn the firewall back on

See:

https://doc.pfsense.org/index.php/Restrict_access_to_management_interface
https://doc.pfsense.org/index.php/Remote_firewall_Administration
