**NCC**

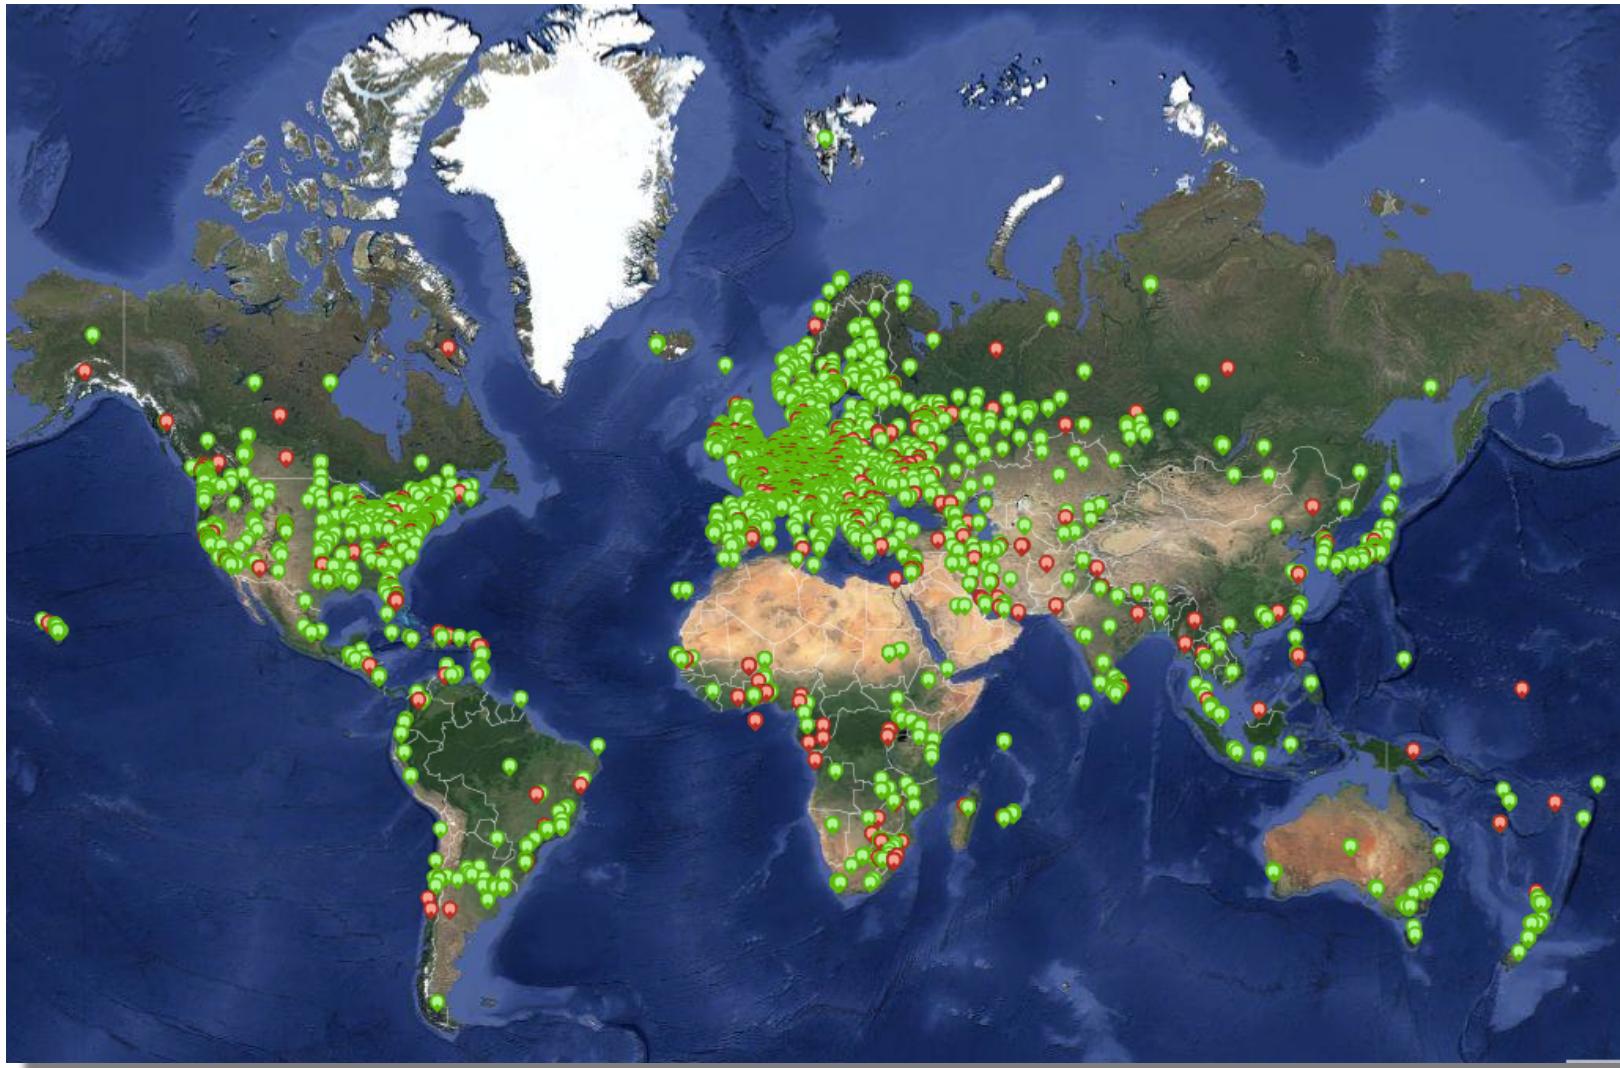

## RIPE Atlas Global Internet Measurement Network

---

NSRC DrukREN Campus Network Design  
Workshop

September 2015

- Active measurements network consisting of thousands of probes
- Ongoing global measurements to root nameservers
  - Visualised as Internet traffic maps
- Ongoing regional measurements towards “anchors”
- Users can run measurements to targets of their choice
  - ping, traceroute, DNS, SSL/TLS and NTP
- Data publicly available via API and visualizations

- 8,500+ probes connected
  - Only 8 probes in Bhutan, and only 2 connected ☹
- 5,000+ active users in the last quarter
- 2,500+ results collected per second
- 35,000+ customised measurements weekly

# Selected RIPE Atlas Use Cases

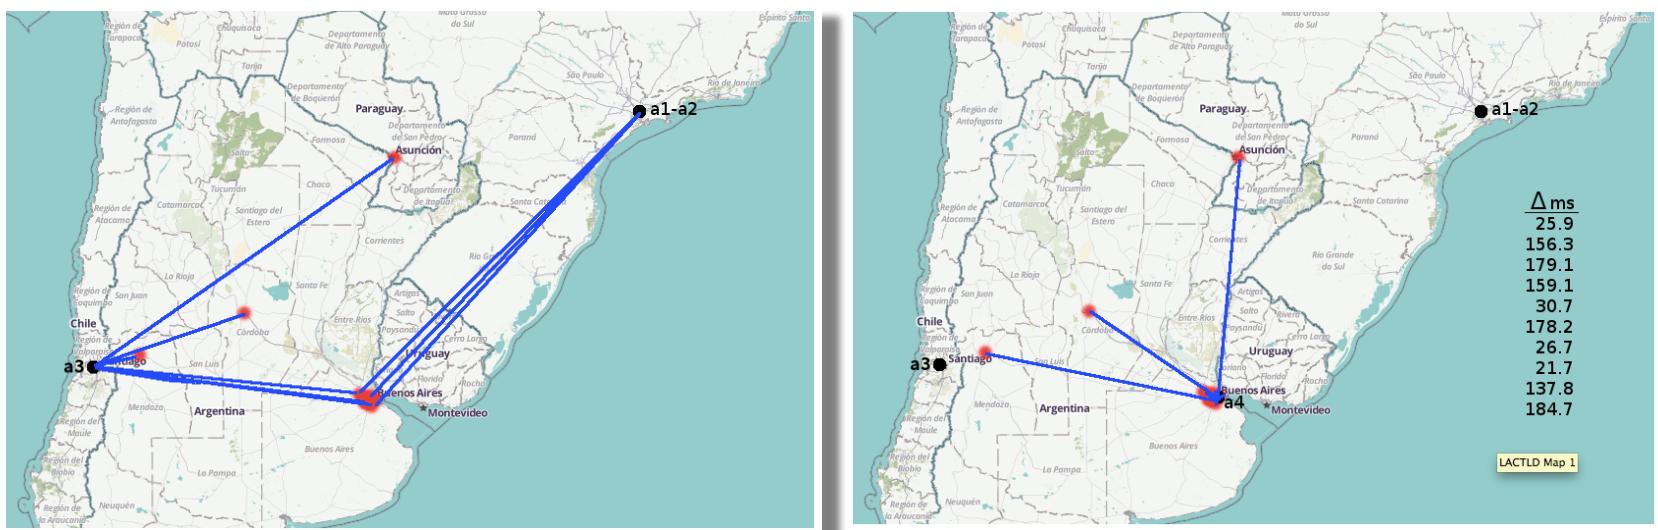

RIPE  
NCC

# Measuring LACTLD Anycast Service

RIPE Atlas | 6

- Visualizing changes in anycast network architecture

- [https://labs.ripe.net/Members/hugo\\_salgado/visualisation-of-a-new-node-in-lactld-anycast-service](https://labs.ripe.net/Members/hugo_salgado/visualisation-of-a-new-node-in-lactld-anycast-service)

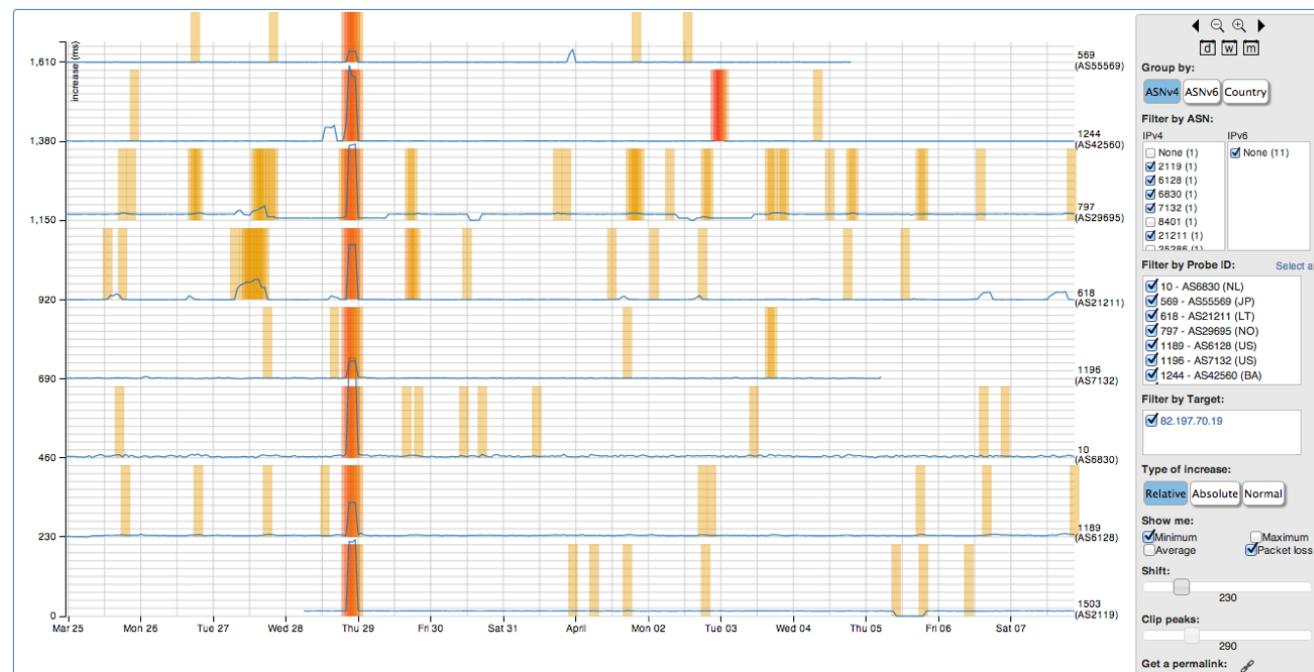

# Monitoring Global Server Reachability

RIPE Atlas | 7

- Seismograph:

- [https://labs.ripe.net/Members/massimo\\_candela/seismograph-user-guide](https://labs.ripe.net/Members/massimo_candela/seismograph-user-guide)
- Multiple ping measurements in one view

# Measuring IXP effectiveness

RIPE Atlas | 8

- Impact of IXPs on keeping traffic local

<https://labs.ripe.net/Members/emileaben/measuring-ixps-with-ripe-atlas>

<https://labs.ripe.net/Members/emileaben/measuring-countries-and-ixps-in-the-see-region>

<http://sg-pub.ripe.net/emile/ixp-country-jedi/CL+AR-2015-04/geopath/>

# RIPE Atlas Community

**RIPE  
NCC**

- For individuals:

- Create a RIPE NCC Access account
- Go to <https://atlas.ripe.net/apply>
- You will receive a probe by post
- Register your probe
- Plug in your probe

- For organisations:

- Host an anchor <https://atlas.ripe.net/anchors/apply/>
- Sponsor RIPE Atlas

- Find out more in your language:

- <http://www.lacnic.net/web/lacnic/ripe-atlas>

- Anchors: stable targets and powerful probes

- Benefits of hosting an anchor:

- External view of your own network - other anchors measure you
- 400 probes also target each anchor with ongoing measurements

all

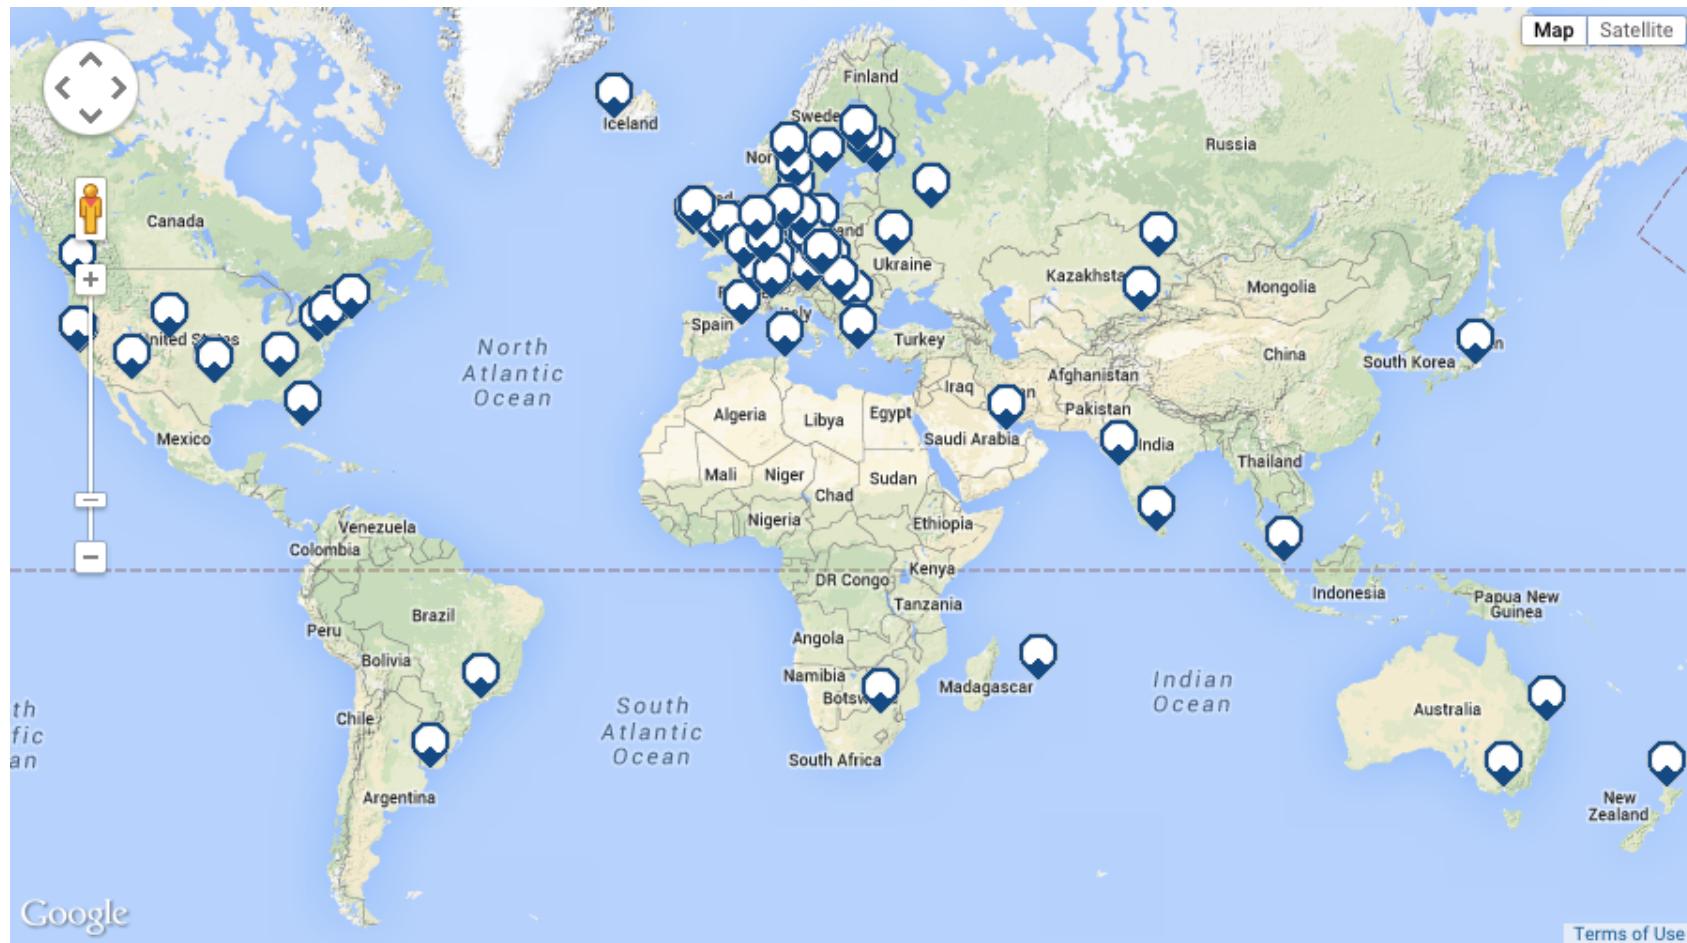

- 140 RIPE Atlas anchors

- DrukREN will receive an Anchor soon
- This anchor will serve all Bhutan probe installations

# Anchor Locations

RIPE Atlas | 12

- If you want to...
  - Help distribute probes outside RIPE NCC service region
  - Give workshops, tutorials and promote RIPE Atlas
- To become an ambassador:
  - <https://atlas.ripe.net/get-involved/become-a-ripe-atlas-ambassador/>
  - email [mcb@ripe.net](mailto:mcb@ripe.net): we will ship you some probes

# Become a Sponsor!

RIPE Atlas | 14

- Benefits:
  - Promotion on RIPE Atlas website
  - Community recognition
  - Double credits for every probe distributed
- Become a sponsor:  
<https://atlas.ripe.net/get-involved/become-a-sponsor/>
- Current sponsors:

- Programmers contribute analysis code:

<https://github.com/RIPE-Atlas-Community/>

- Measurements source code available

[https://labs.ripe.net/Members/philip\\_homburg/ripe-atlas-measurements-source-code](https://labs.ripe.net/Members/philip_homburg/ripe-atlas-measurements-source-code)

- <https://atlas.ripe.net>
- Mailing list for active users: [ripe-atlas@ripe.net](mailto:ripe-atlas@ripe.net)
- Roadmap: <http://roadmap.ripe.net/ripe-atlas/>
- Articles and updates on RIPE Labs:  
<https://labs.ripe.net/atlas>
- Questions: [atlas@ripe.net](mailto:atlas@ripe.net)
- Twitter: @RIPE\_Atlas and #RIPEAtlas

## Additional Slides

---

**RIPE  
NCC**

- RIPE Atlas streaming: a new architecture that allows users to receive measurement results as soon as the probes send them
  - Real-time measurement results and connection events
  - Can specify filters
  - Possibility to replay history (prototype)
  - <https://atlas.ripe.net/docs/result-streaming/>
  - Results from RIPE Atlas hackathon:  
<https://labs.ripe.net/Members/becha/ripe-atlas-hackathon-results>

# New Features

RIPE Atlas | 19

- New measurement type: NTP
- [https://labs.ripe.net/Members/philip\\_homburg/ntp-measurements-with-ripe-atlas](https://labs.ripe.net/Members/philip_homburg/ntp-measurements-with-ripe-atlas)

Create a New Measurement

Step 1 Definitions

Please select the type of measurement you want to create

+ Ping + Traceroute + DNS + SSL + NTP

Step 2 Probe Selection

Worldwide 50

+ New Set - wizard +New Set - manual + IDs List + Reuse a set from a measurement

Step 3 Timing

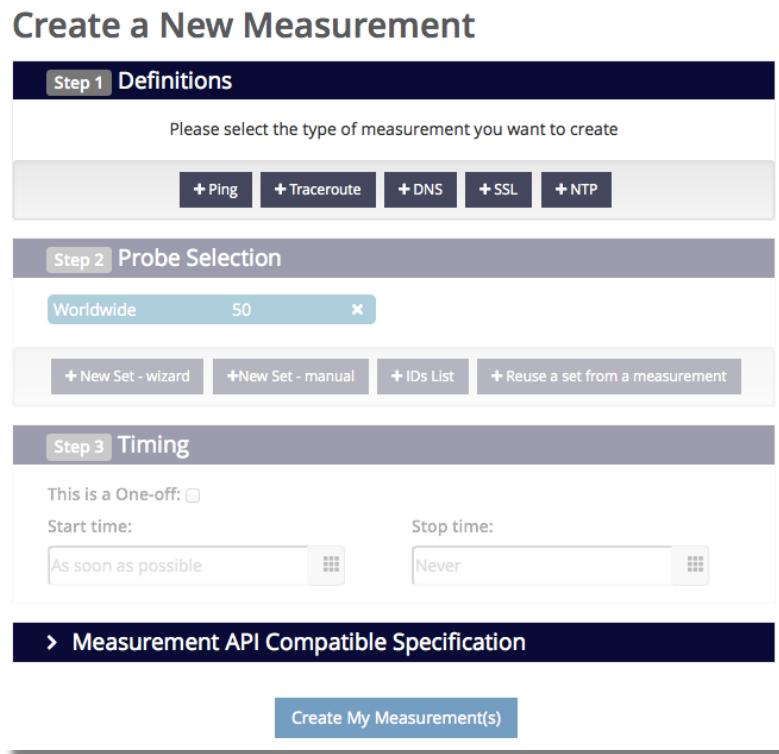

This is a One-off:

Start time: Stop time:

As soon as possible  Never

> Measurement API Compatible Specification

Create My Measurement(s)

## More RIPE Atlas Use Cases

---

**RIPE  
NCC**

# Root Name Server Measurements

RIPE Atlas | 21

- Which instance is queried?

- Per country
- Per ASN

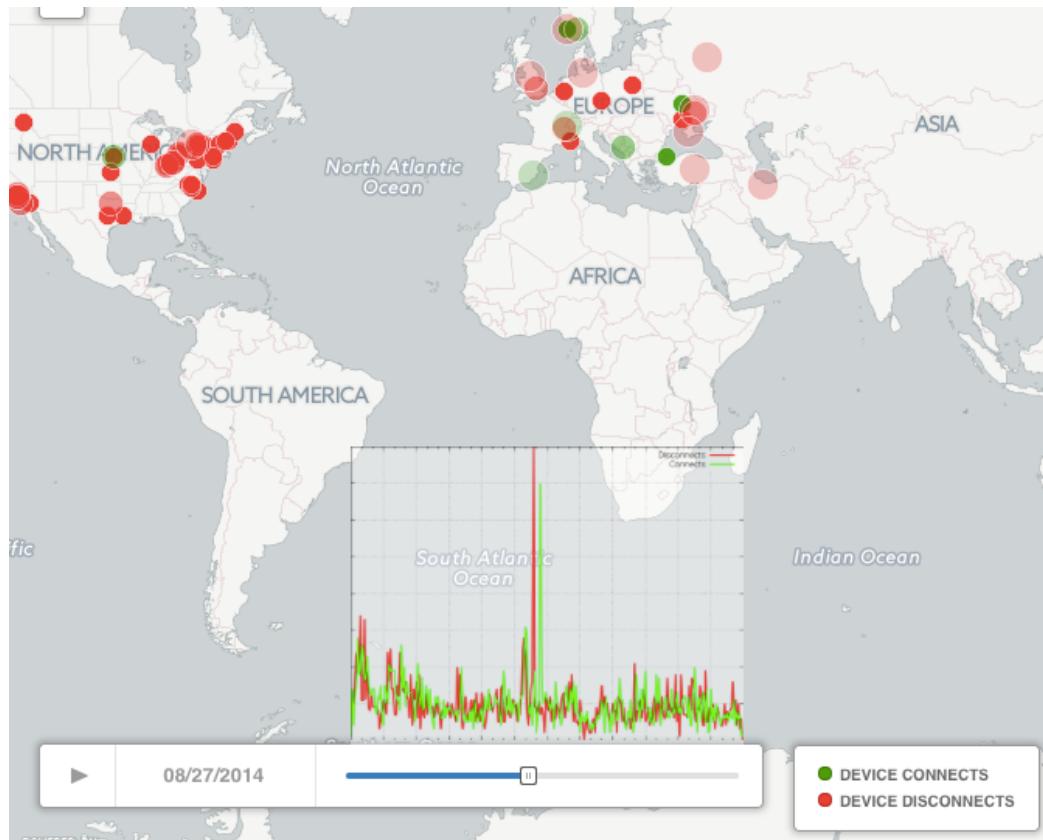

- What's the fastest response?

- TCP/UDP performance

# Visualising Network Outages

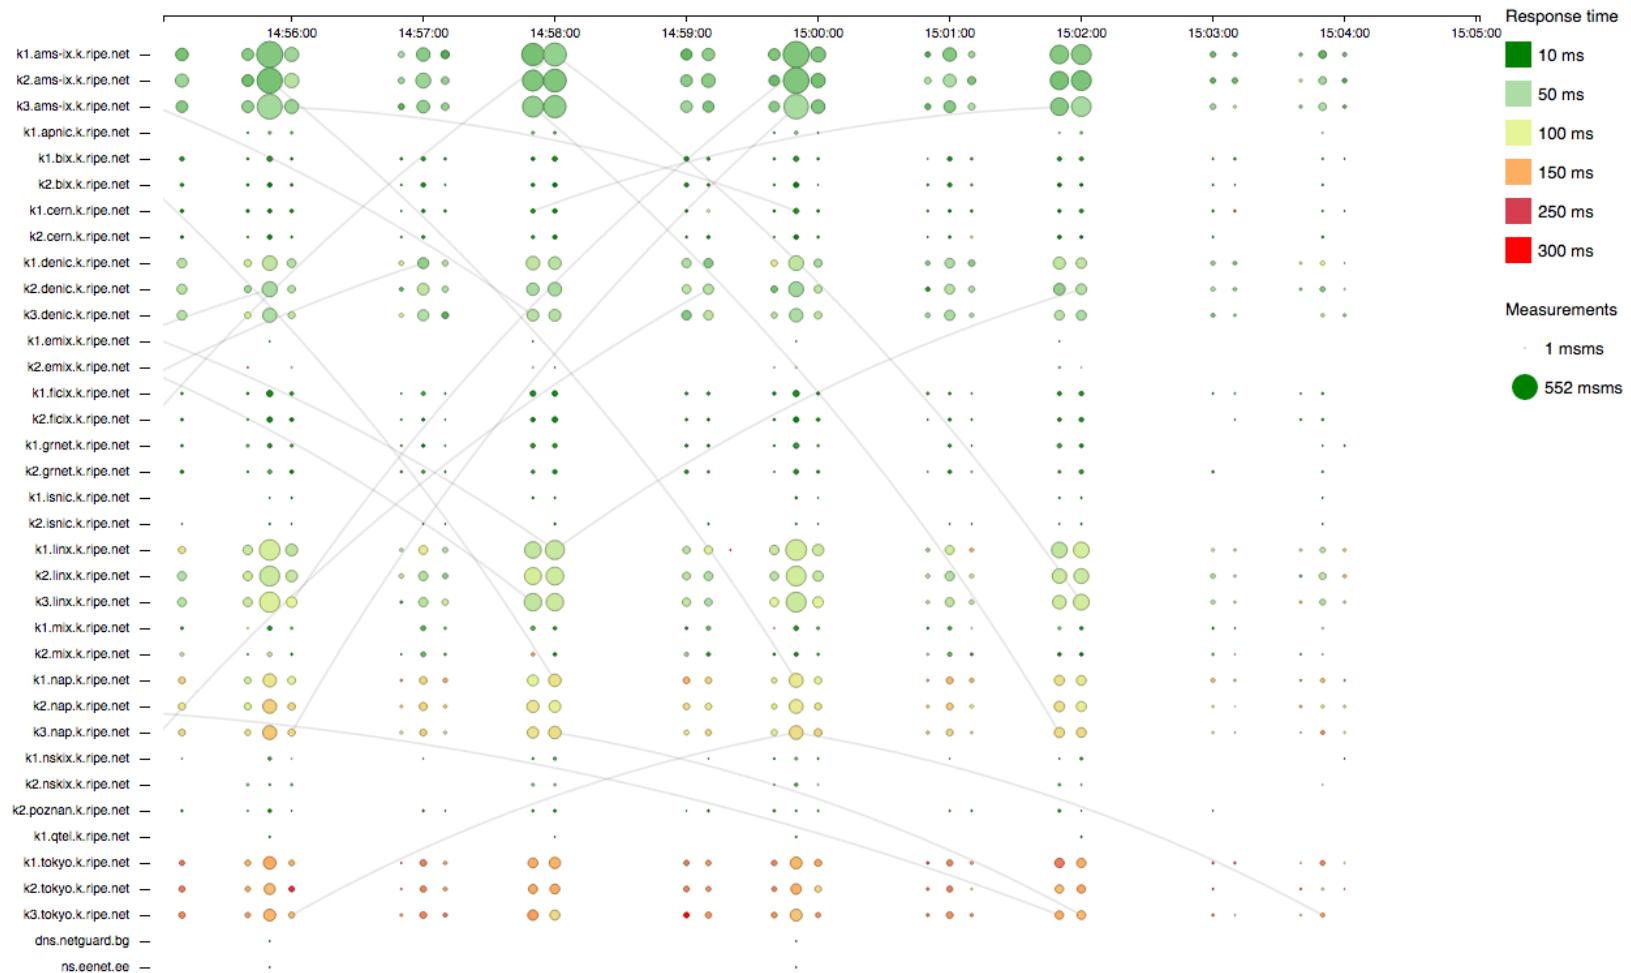

RIPE Atlas | 22

- <https://labs.ripe.net/Members/emileaben/visualising-network-outages-with-ripe-atlas>
- <https://labs.ripe.net/Members/emileaben/facebookdown-and-what-internet-data>
- <https://labs.ripe.net/Members/emileaben/time-warner-cable-outage>

# Monitoring K-root Performance

RIPE Atlas | 23

# Monitoring DNS: [dnsmon.ripe.net](https://dnsmon.ripe.net)

RIPE Atlas | 24

- Currently monitoring small selection of TLD zones
  - Root name servers, 30 ccTLDs and few gTLDs
  - New zones added later this year
- On the roadmap: “domain checks”
- <https://atlas.ripe.net/dnsmon>

[https://labs.ripe.net/Members/fatemah\\_mafi/an-updated-dns-monitoring-service](https://labs.ripe.net/Members/fatemah_mafi/an-updated-dns-monitoring-service)

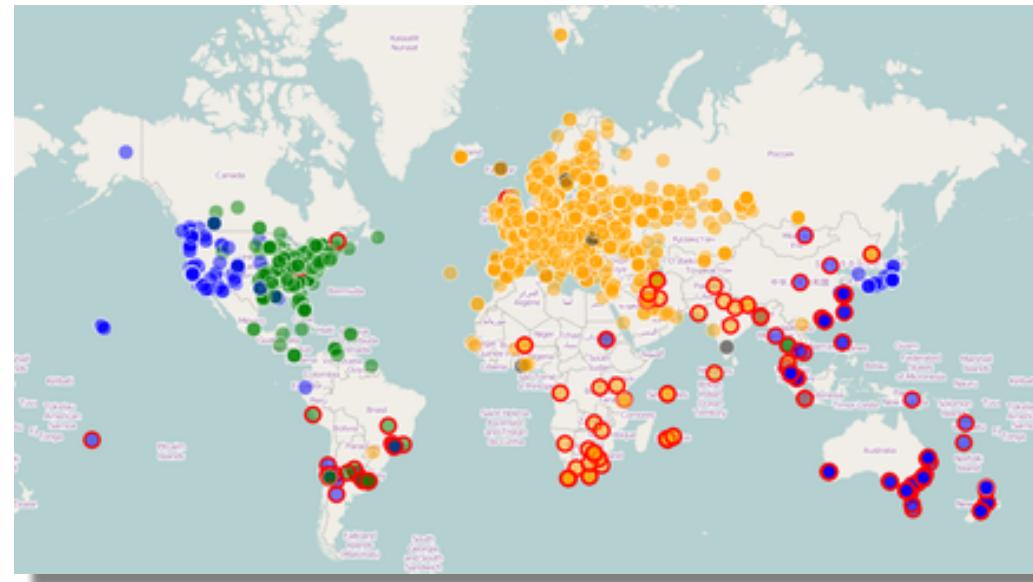

- Generating alerts via “status checks”
  - Based on ping measurements
  - User defines alert parameters
  - Integrate into existing tools like Icinga and Nagios
  - <https://atlas.ripe.net/docs/status-checks/>
- GitHub examples, contributed by operators:
  - <http://bit.ly/1BSi1Fu>
- Post on Icinga blog:
  - <http://bit.ly/1EPCR1C>

# Latency to Multiple Locations

RIPE Atlas | 26

- Together with Wikimedia we identified ways to decrease latency and improve performance

- <https://labs.ripe.net/Members/emileaben/how-ripe-atlas-helped-wikipedia-users>

## RIPE Atlas Success Stories

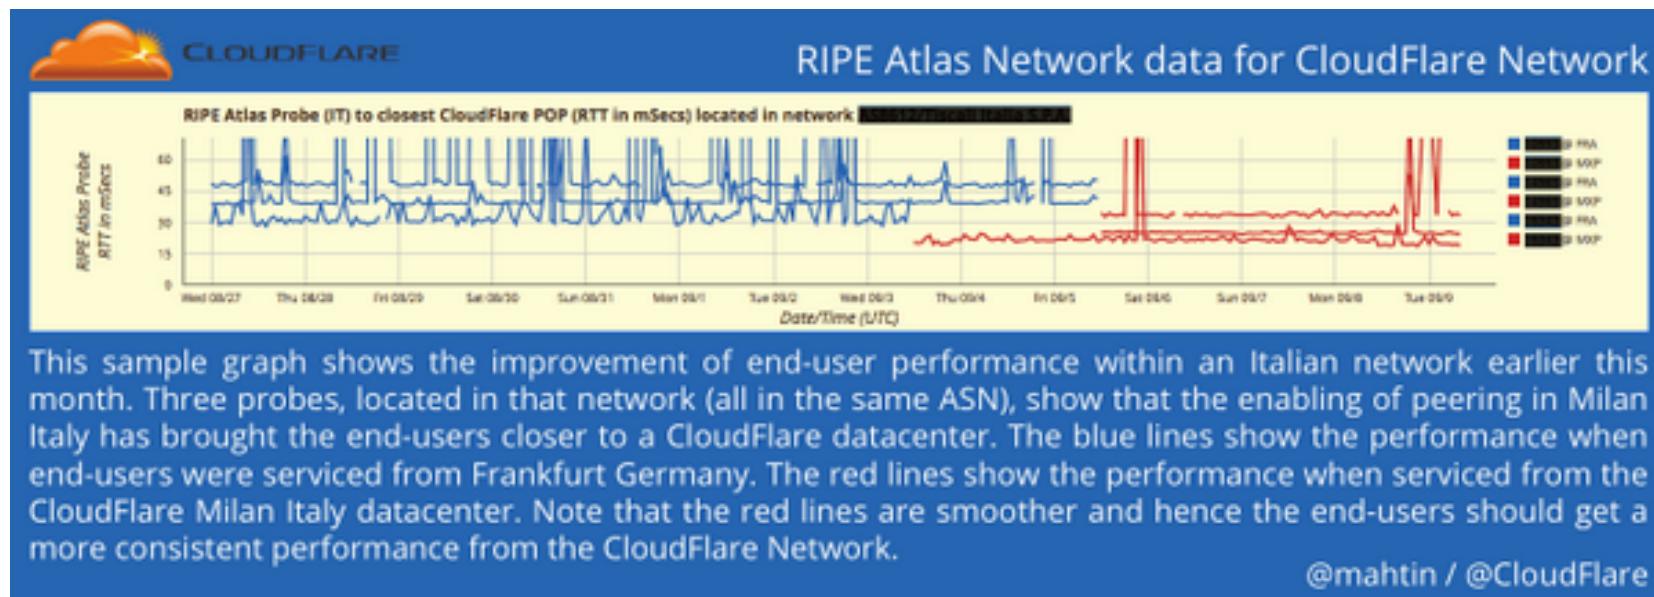

---

### Operators

**RIPE  
NCC**

## Network Monitoring with RIPE Atlas

---

**RIPE**  
**NCC**

- Network operators use tools to monitor network health
  - Such as Nagios & Icinga
- Tools can receive input from RIPE Atlas via API
- Benefits:
  - Pings from 500 out of 6,000+ probes around the world
  - See your network from the outside
  - Plugs into your existing tools and practices

- Three easy steps:

1. Create a RIPE Atlas ping measurement
2. Go to “status checks” URL
3. Add your alerts in Icinga or Nagios

# 1. How to Schedule a Measurement

RIPE Atlas | 37

- General case - applicable for ping, too!
- Log in to <https://atlas.ripe.net>
- Go to “My Atlas” and “Measurements”
- Choose “New Measurement” or “One-off”
  - Most measurements are periodic and last a long time
  - Choose type, target, frequency, # of probes, region...
  - You will spend credits (next slides)
- More details: <https://atlas.ripe.net/doc/udm>
- Or use the API:
  - <https://atlas.ripe.net/docs/measurement-creation-api/>

- To perform measurements, you spend credits
  - Ping costs 10 credits, traceroute costs 20, etc.
- Credit system introduced to ensure fairness and protect system from overload
- By hosting a probe, you earn credits
- Extra credits can be earned by:
  - Being a RIPE NCC member
  - Hosting a RIPE Atlas anchor
  - Sponsoring probes
- More details: <https://atlas.ripe.net/doc/credits>

## 2. Creating Status Checks

---

RIPE Atlas | 39

- Status checks work via RIPE Atlas' RESTful API
  - [https://atlas.ripe.net/api/v1/status-checks/  
MEASUREMENT\\_ID/](https://atlas.ripe.net/api/v1/status-checks/MEASUREMENT_ID/)
- You define the alert parameters, for example:
  - Threshold for percentage of successful replies
  - How many of the most recent measurements to evaluate
  - Maximum acceptable packet loss
- Documentation:
  - <https://atlas.ripe.net/docs/status-checks/>

### 3. Icinga Examples

---

RIPE Atlas | 40

- Community of operators contributed configuration code!
  - Make use of the built-in “check\_http” plugin
- GitHub repo examples:
  - [https://github.com/RIPE-Atlas-Community/ripe-atlas-community-contrib/blob/master/scripts\\_for\\_nagios\\_icinga\\_alerts](https://github.com/RIPE-Atlas-Community/ripe-atlas-community-contrib/blob/master/scripts_for_nagios_icinga_alerts)
- Post on Icinga blog:
  - <https://www.icinga.org/2014/03/05/monitoring-ripe-atlas-status-with-icinga-2/>
