

Campus Security Design Exercise

Acceptable Use Policy

Within your group, following the advice in the presentation, spend 10 minutes designing an Acceptable Use Policy for your Campus.

After 10 minutes, the Workshop Instructors will ask you to present your AUP to the rest of the class.

Campus Security Design Considerations

While you are waiting, as a group think about some of the issues raised in the two Campus Security Presentations. Are there situations where separate staff networks would be appropriate? What mechanisms could be used to grant a higher level of access to staff? What additional challenges are added by wireless? By IPv6?

Make notes about your thoughts, and contribute to the class discussion when the Instructors introduce the topic.
