ASREN

Enabling Innovation for Arab Academe Through Advanced e-Infrastructures

Yousef Torman, Co-Managing Director, ASREN, torman@asrenorg.net

What are Research & Education Networks?

- Research and education networks are **dedicated** networks connecting the Universities, Schools, Research Centers, Hospitals, Museums and any other institution that may have research and education activities.
- National Research and Education Networks (**NRENs**) are established to provide connectivity and communications services for the research and education communities at the national level
- Regional Research and Education Networks (**RRENs**) are connecting the NRENs to provide connectivity and services to researchers and educators across the borders.

Main Drivers for Research Networks

- **Technological:** Satisfy high demand *eScience* initiatives, **Multimedia Collaboration**, Distributed High Performance Computing (**HPC, GRIDs**) for **Earth Sciences, High Energy Physics** (CERN, LHC...), **Bioinformatics, Computational Chemistry, Radio-astronomy, Engineering Planning** (computations, emulations & simulations), **Cultural** (archiving, collaborative digital access & processing) ...
- **Social:** Common culture of R&E community, Virtual Organizations VOs, collaborative research, tele-education, Smoothing the Digital Divides, affordable high bandwidth linkage to the Global R&E community
- **Economic:** Demand aggregators: University & school staff, students, researchers. Consolidation & control of diverse public expenditures. Promotion of Information Society (e-Government, e-Business, e-Health). Stimulation of technological & telecom markets → Competitiveness

Major Objectives for R & E Networks

- Provide scientific research and education institutions with reliable means of communication in order to facilitate ease of cooperation and coordination
- Strengthen the notion of partnership and encourage joint scientific research among communities.
- Minimize cost of research by using diversified academic and technical resources to be made available for use on the network with no need for duplicating investment.
- The fact that students, teaching staff, and researchers use such dedicated networks would eventually uplift efficiency and productivity and would boost the concept of creativity and innovation.

NRENs: Major Services

- Unified connectivity to all research and education institutions to provide country-wide standard communication facilities and capabilities to faculty, researchers, students, and staff, leading to better sharing of resources, information, data, knowledge and expertise.
- Consolidated Internet services, with the NREN acting as an ISP to universities and research institutions. Available statistics in some countries have shown that savings can go up to 40% on access costs, while enabling common access policies and configurations at the national level.
- Connectivity to regional research networks, providing opportunities for joint research collaboration and online education initiatives.
- Access to content, common repositories, and library resources of all universities with a unified subscription to all journals and periodicals for all Universities and research centers.

NRENs: Major Services *(continued)*

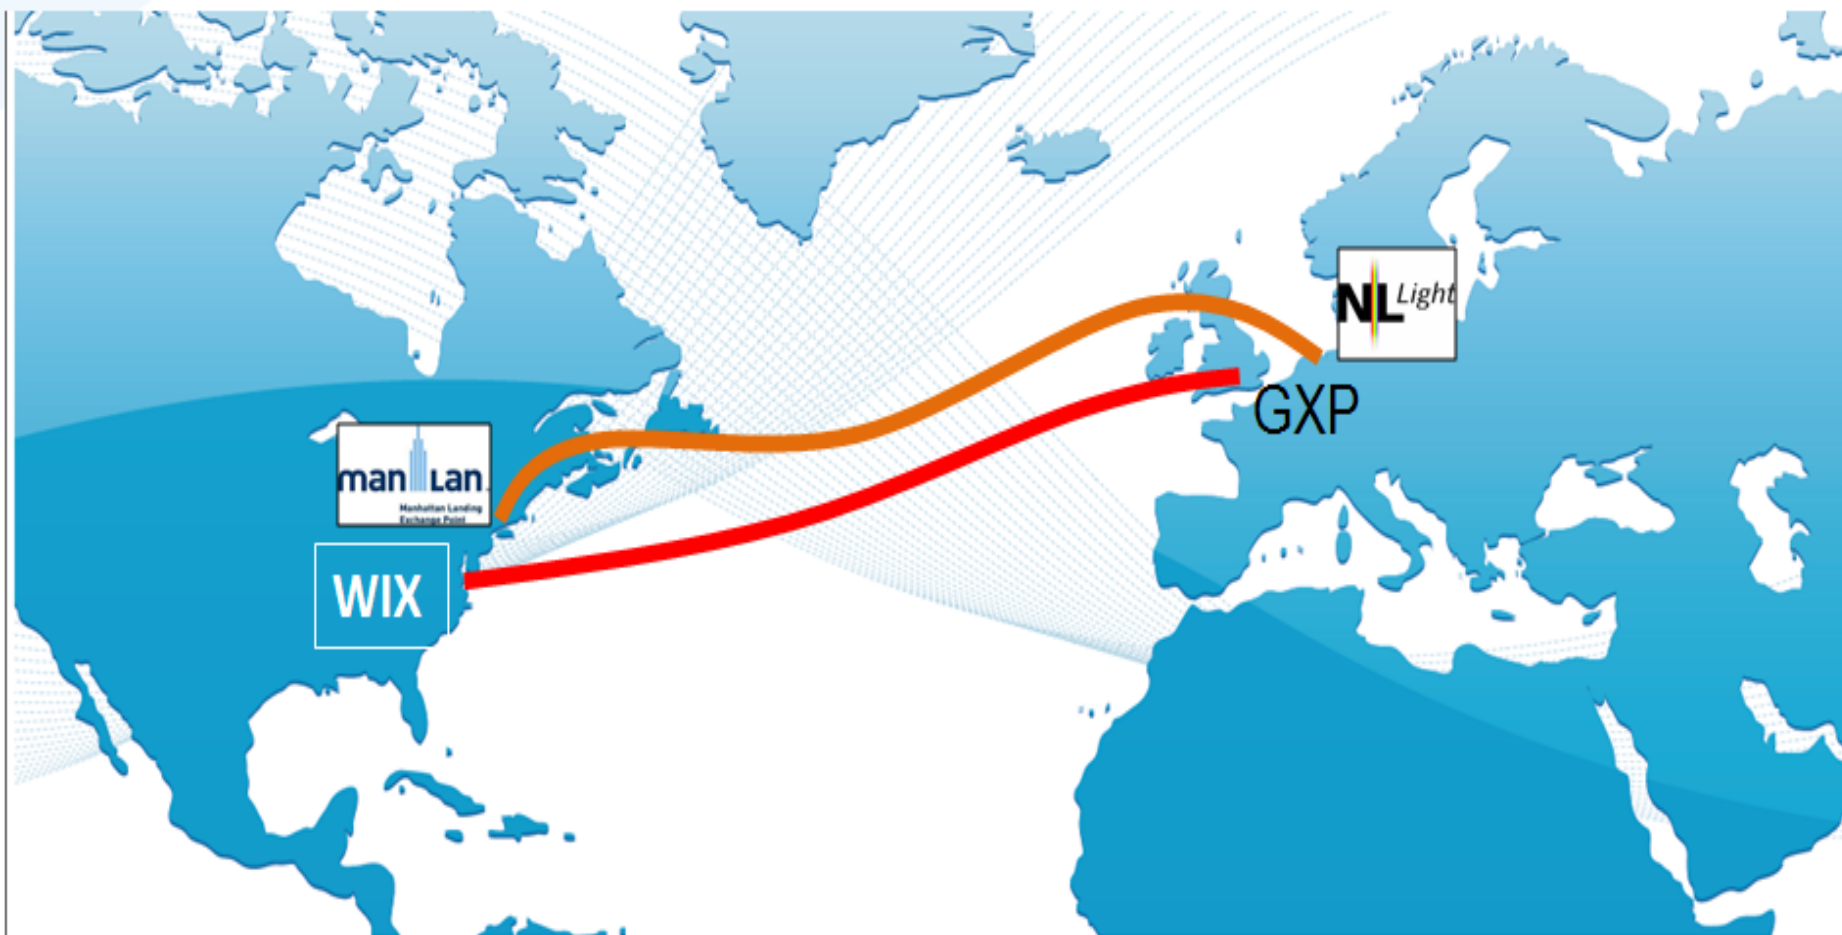

- Video conferencing services, media streaming, IP telephony, access federations, and wireless roaming for the purpose of facilitating communications, exchanges of lectures, and coordination of meetings, training and conferences between all users in universities and institutes.
- Consolidated agreements with software vendors on behalf of all Universities for licensing, with savings reaching up to 50% in some cases.
- Common caching, filtering and anti-spam and anti-virus protection services provided by NRENs to all connected institutions.
- Furthermore, an NREN can be eligible to create and manage a national Internet Exchange depending on the regulations of the Country, and provide domain name registry services and networking consultancy.

What an NREN (v2) is not—*what it must become*

specialized regional ISP—*essential global platform*
afraid to take risks and experiment—*innovation incubator*
supply-side market player—*demand-side market maker*
contract broker—*market aggregator*
knowledge carrier—*knowledge multiplier*
provider of shrink-wrapped solutions—*economic development engine*
business-as-usual partner—*transformation vehicle*
neutral collaboration connection—*collaboration enabler*
disinterested community service—*community developer*
political tool—*political stabilizer*

National R&E Networks: Not just networks anymore

STEPHEN WOLFF

Internet2

JUNE 2013

NREN 3.0

@TNC 2013

Implications/consequences

- **Globalization** ⇒ No NREN is an island
- **Team science** ⇒ (possibly virtual) team networks for virtual communities
- **Big Data** ⇒ More than just bigger pipes

[12]

Further implications

- **Globalization** ⇒ It's time to *engineer* global R&E connectivity: from *NRENs* to a *GREN*
- **Team science** ⇒ A one-size-fits-all IP network is not enough. SDN (e.g., OpenFlow, OSCARS) will help *users and applications* configure the network
- **Big Data** ⇒ Re-architecting (Science DMZ), tuning (Web10G), measuring (perfSONAR)

The Case for NRENs

A repository of resources to support funding, advocacy and the advancement of national and regional R&E networks

MAKING THE CASE | CASE EXAMPLES | RESOURCES & TOOLS | CONTACT US

Welcome

Monday 17 Aug 2015 | Time - 13 56

Welcome to the Case for NRENs portal

This portal offers tools and materials to assist national and regional R&E networks (NRENs and RRENs) "make a case" to their users, funders, government agencies, vendors and partners.

It also provides a toolkit of information and guidance materials to support in particular new and emerging NRENs.

The 'Case for NRENs' portal was developed in response to demand from a number of regional networks where NRENs are starting up in order to share global experiences and best practice.

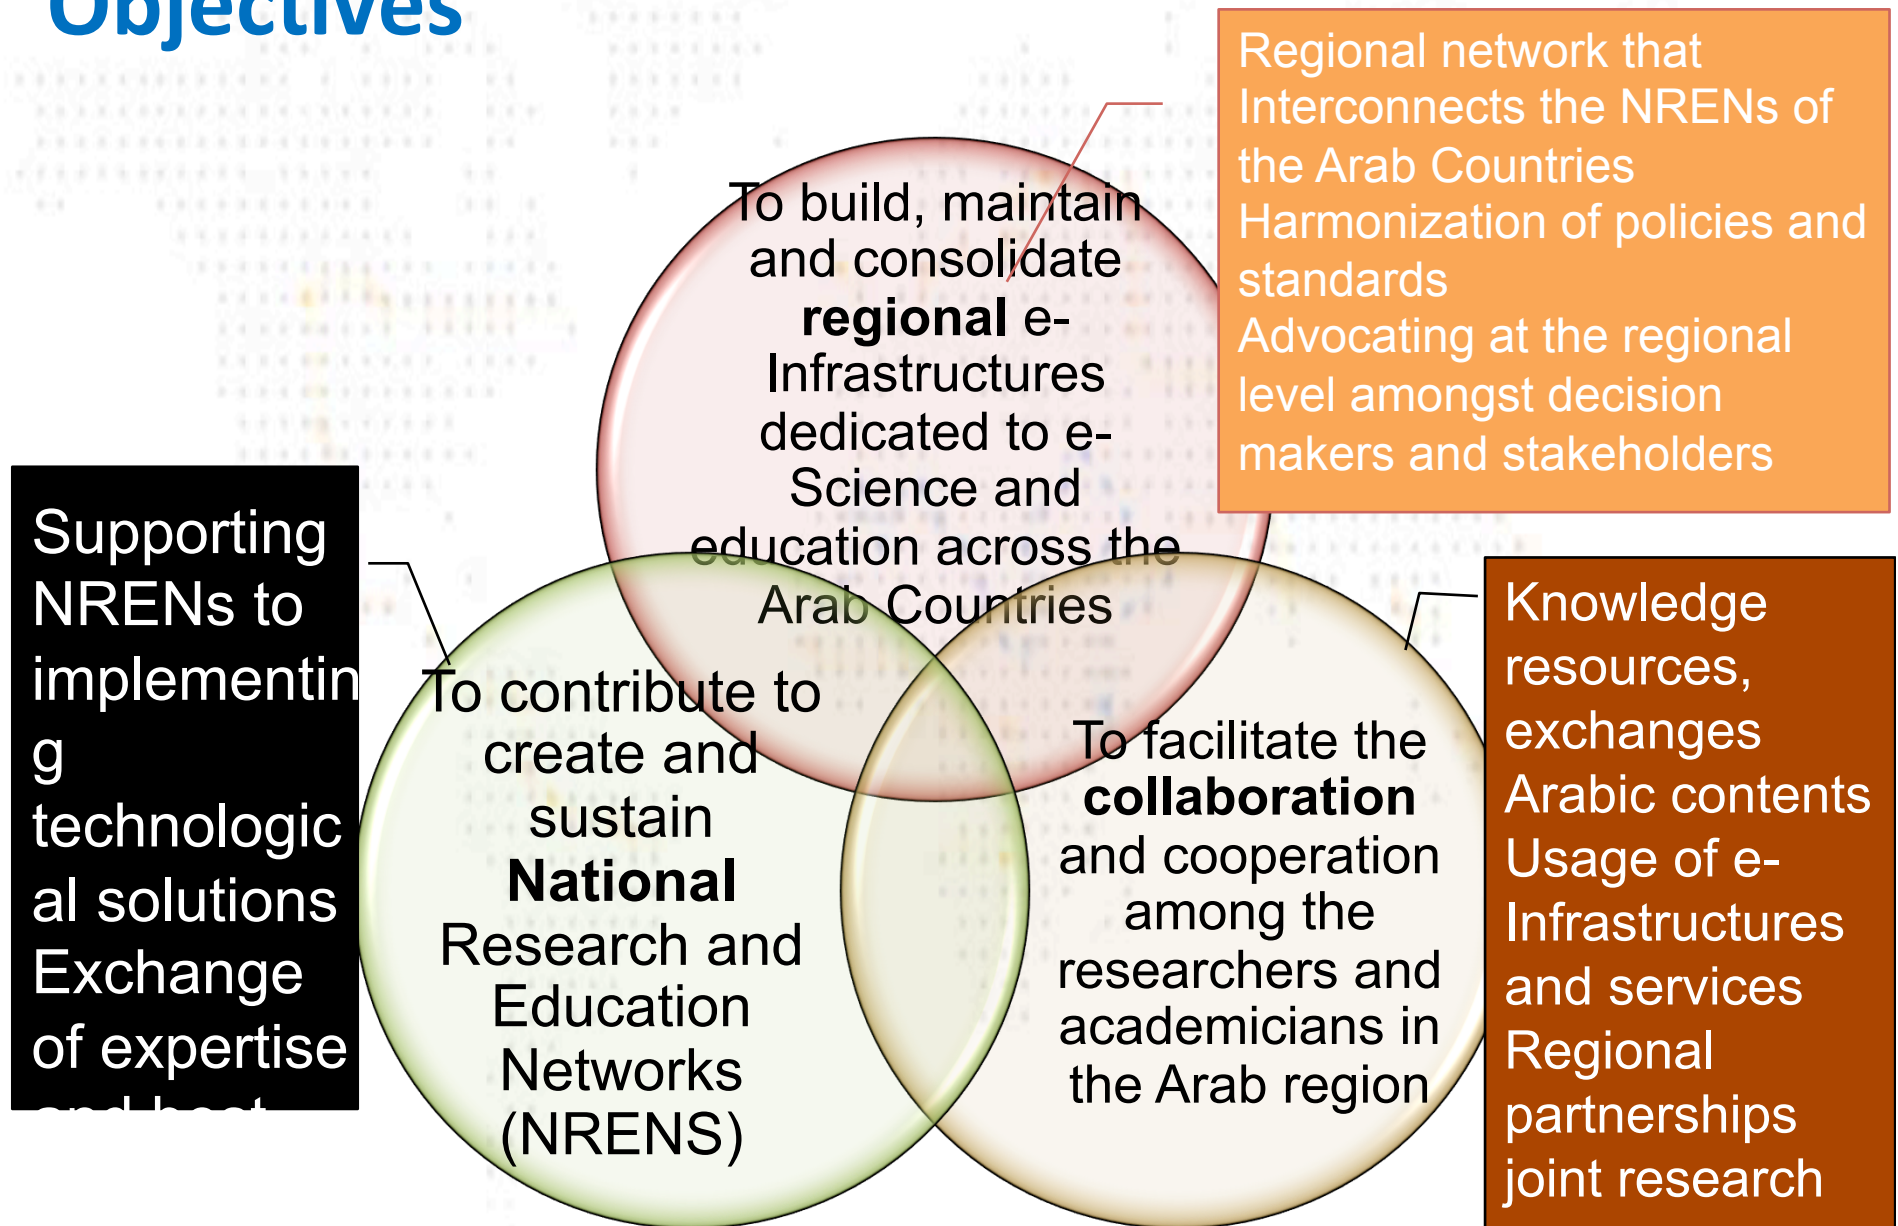

How to use and contribute to this portal ➤

<http://services.geant.net/case-for-nrens/Pages/Home.aspx>

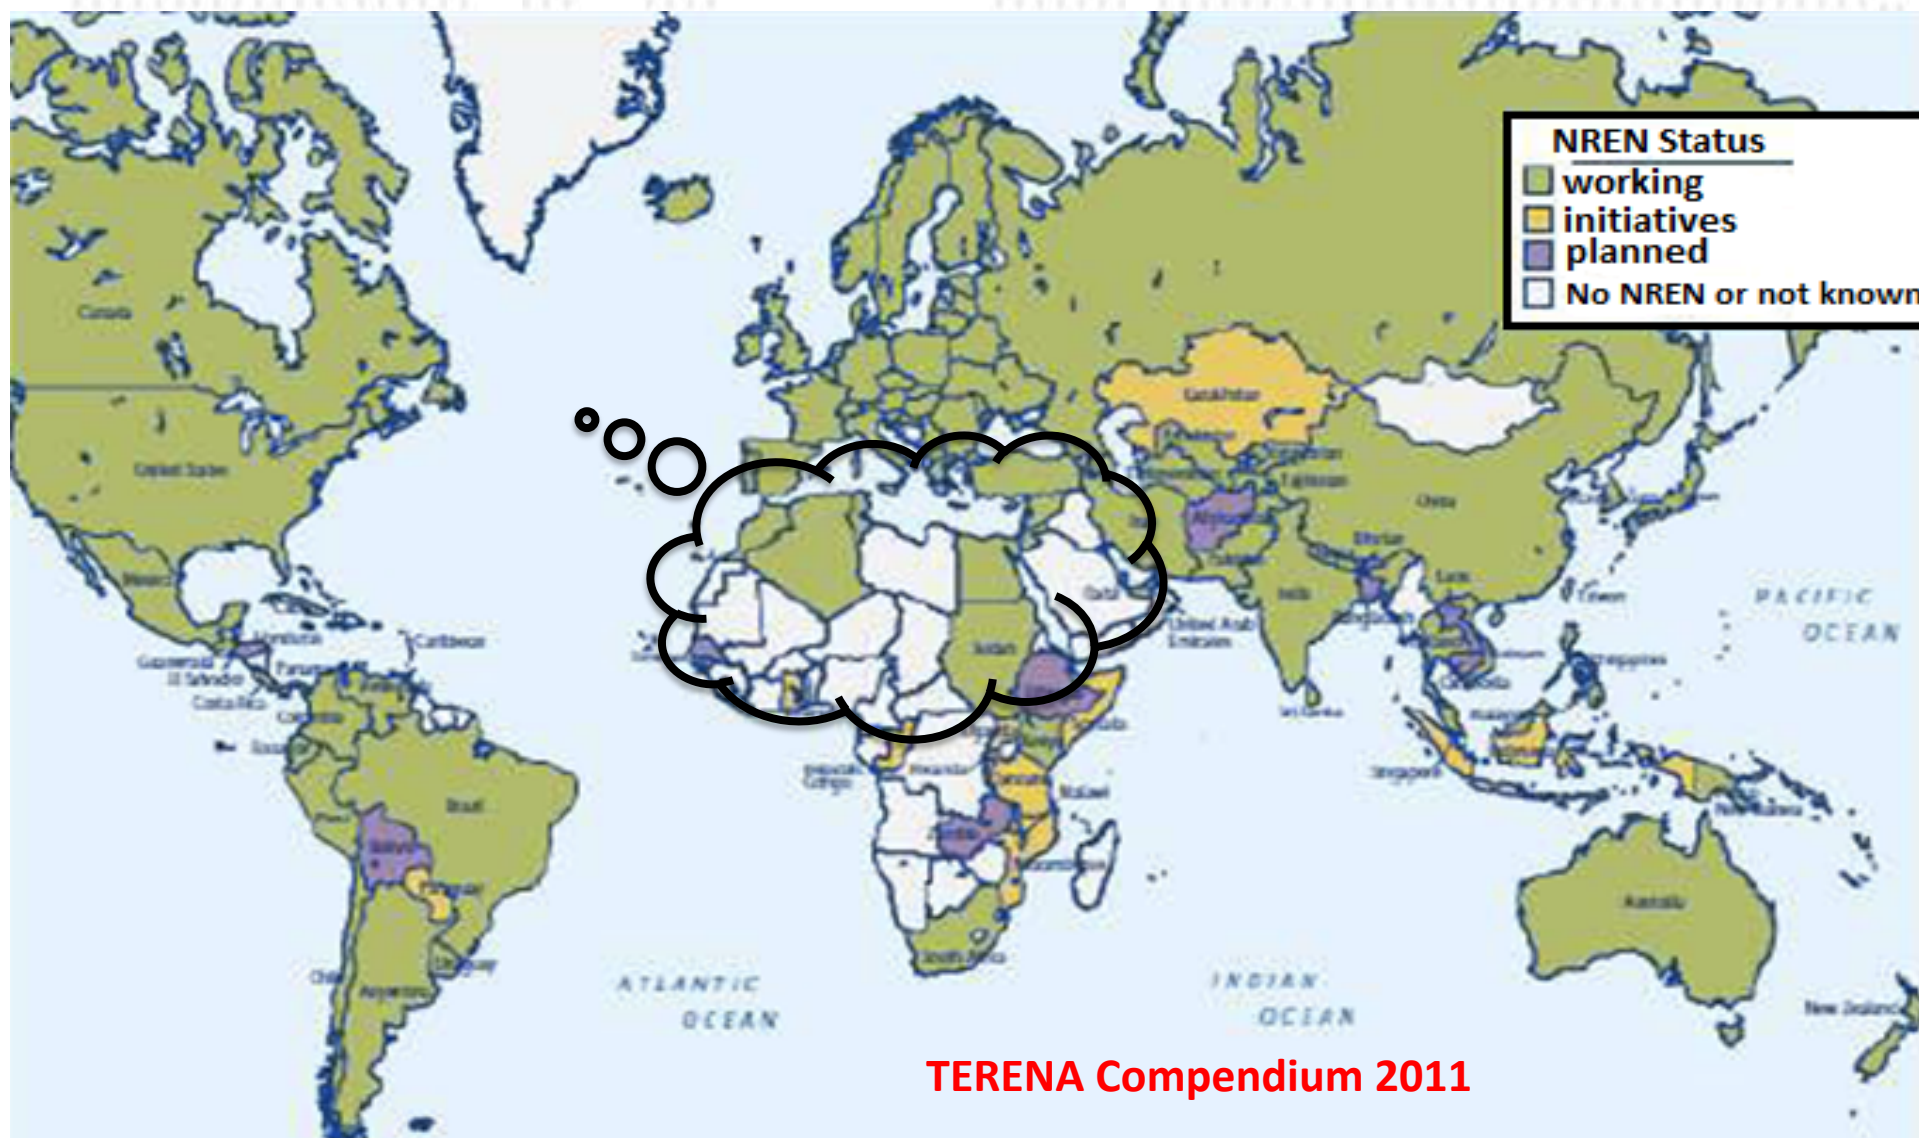

A legal non for profit organization with Arab NRENs as shareholders for promoting world-class Pan-Arab e-Infrastructures and E-services for the R&E communities to boost Scientific Research and regional Cooperation

- **Vision Statement:** Pan-Arab collaborative research and education projects and activities, contribute to boost the scientific research, innovation and education levels in the Arab countries by uplifting efficiency and productivity of research and education communities.
- **Mission statement:** To implement, manage and extend sustainable Pan-Arab e-Infrastructures dedicated for the Research and Education communities and to boost scientific research and cooperation in member countries through the provision of world-class e-Infrastructures and E-services.

NRENs Connectivity Status 2012

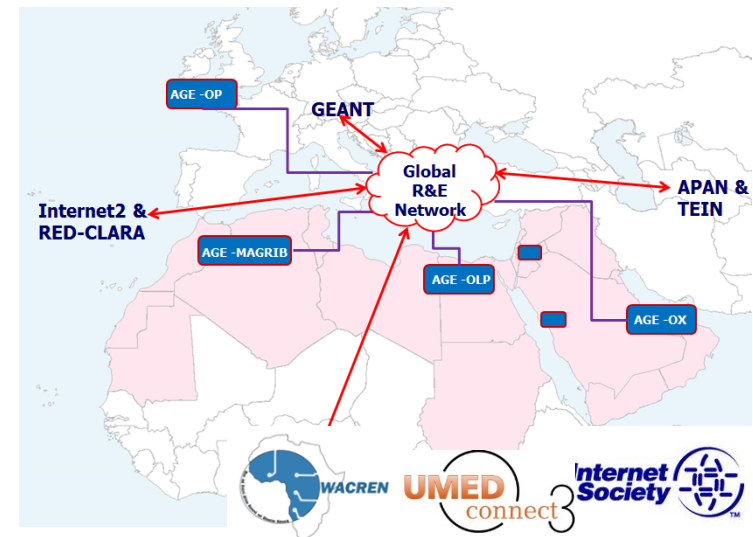

ASREN Network

AGE - OP

- Arabian Global Educational Open PoP
- Installed and operational at London Telicity in cooperation with GEANT and WACREN
- Operational & ready to interconnect
- Operations by ASREN and GEANT
- ASREN team visited DANTE (GEANT Association in Cambridge to get training and to agree operations, monitoring, support...
- STM1 Connection to Jordan has been operated.

AGE - OP

- Organizational
 - Partnership to support regional development of high-speed connectivity and open exchange points
 - ISOC, Cisco – Equipment donation
 - GEANT – network operation in the initial phase, first line of support
- Operational
 - Regional network operation center – GEANT / ASREN
- Technical
 - Telecity data center (SLA)
 - Cross connect to GEANT and world REN
 - Cross connect to ISP (~40 times cheaper)

ASREN NOC

- ASREN Rack co-located with WACREN
- Telecity Data center
- Operate, maintain, and manage communication and information flow with the connected RENs and upstream networks
- To be integrated in GEANT's NOC in the initial phase

Cisco ASR 1002x's

- Hardware redundancy
 - Control panel redundancy
 - Power supply redundancy
 - Multiple connection cards
 - Redundant supervisor (one software)
- 3 – years vendor warranty
- Cisco SLA

Telecity SLA

- Data center serviceability
- 2nd line support

Description	Notes
Colocation & Bandwidth	
Full standard rack 40U (8A / 1.76kW limit) - single power bar	Where available / Excludes power usage
Additional power bar from redundant feed	Where available
Power consumption is excluded from the price - 18.5p per kWh	Applicable to all data centres
Cabling - Fibre - SM or MM / Presentation: SC/PC, FC/PC, E2000 (per cable)	Monthly price only applicable after first year

DANTE/ EUMEDCONNECT3 SLA

GÉANT IP Service Level Agreement (SLA)

The following are the implicit Service Level Agreements (SLAs) for the GÉANT IP service and corresponding equipment:

Affected NREN or service	Measurement	SLA
All NRENs	Time to respond to a fault	15 minutes
Multi-homed on-net NRENs	Service availability	99.999%
Multi-homed NRENs connected to GÉANT with third party managed circuits	Service availability	99.9%
Single-homed NRENs	Service availability determined on a case by case basis	Typically at least 99.4%
GÉANT PoPs in Europe	Time to fix a fault	5 hours

AGE-OX

- **Arabian Global Educational Open Exchange (AGE-OX) to open in Fujairah, United Arab Emirates** led by national network Ankabut in Fujairah
- 10G connectivity to Internet2 in Singapore and future links to Internet2 in Europe/Americas to support US Campus & Research collaborations across the Middle East

GÉANT

What is eduroam?

eduroam (**education roaming**) is the secure, world-wide roaming access service developed for the international research and education community.

Having started in Europe, eduroam has gained momentum throughout the research and education community and is now available in 71 territories.

Advisories

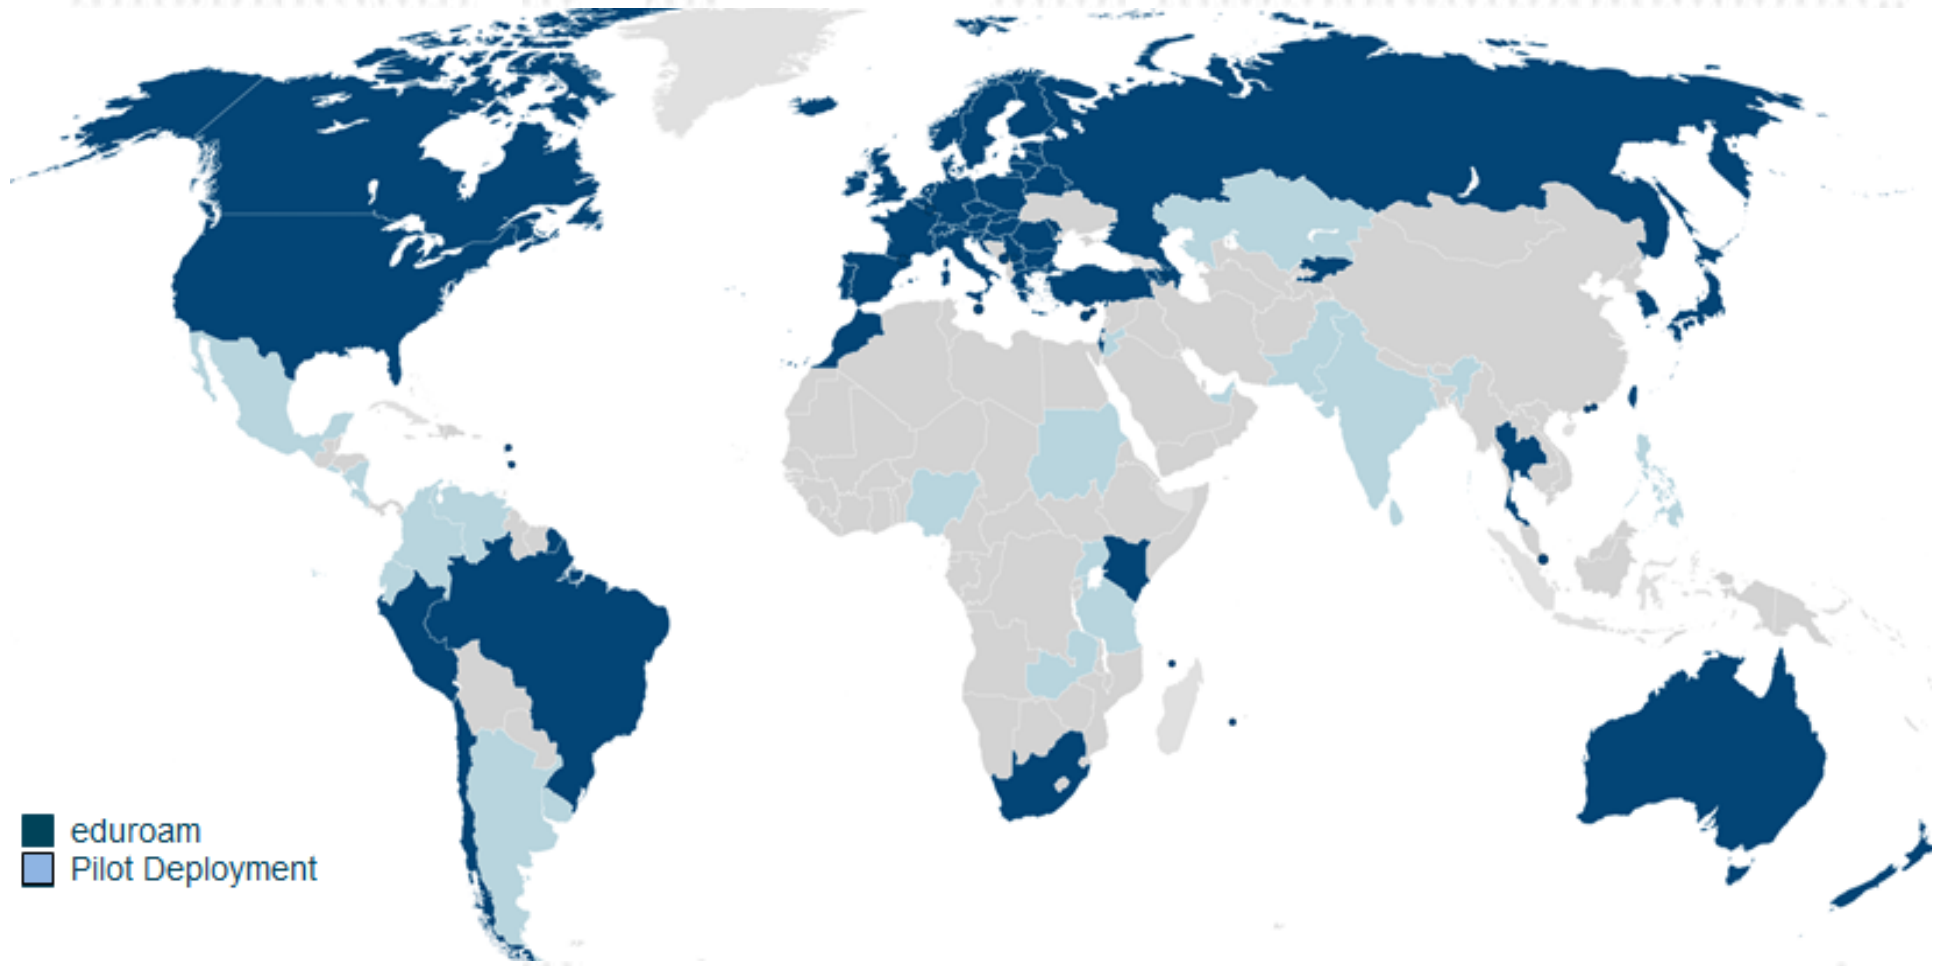

- > 004
RADIUS Attribute Issues
- > 003
Cipher suite selection for eduroam
- > 002
Internationalised domain names for eduroam realms
- > 001
Do not use web logins for eduroam

News

- > 29 January 2013
New eduroam CAT eases user configuration and admin support
- > 18 December 2012
GeGC first term ends in period of growth for eduroam

Implementation in Morocco, KSA, Qatar, UAE, Lebanon, Algeria
Pilots in Egypt, Tunisia, Jordan, Oman, Sudan

■ eduroam
■ Pilot Deployment

ASREN, together with some Arab NRENs started implementing eduroam

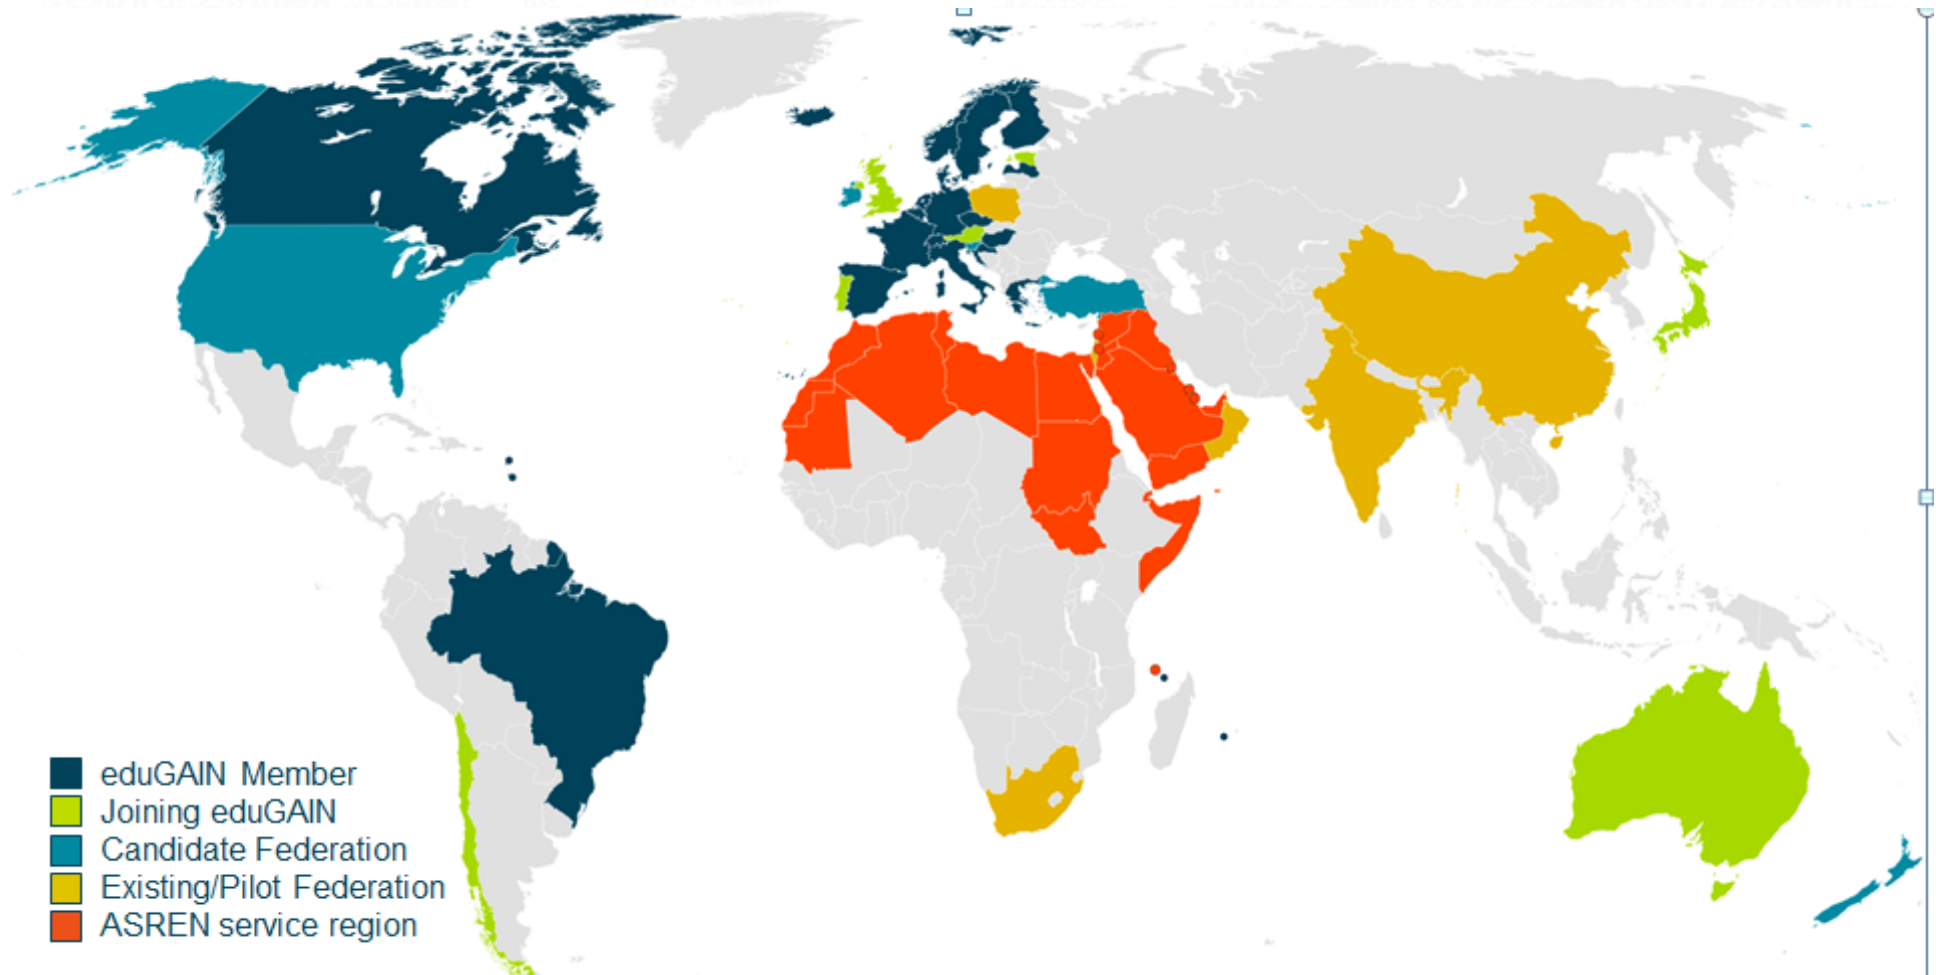

ASREN IdP

- ASREN IdP Identity Provider is a [SAML](#) standard-based service powered by [Shibboleth](#)
- Allows the use of a single identity to sign-in into secure websites, Science Gateways ...
- A member of [Grid Identity Pool \(GrIDP\)](#) federation and currently authenticates the users of several [Service Providers](#)

<https://idp.asrenorg.net/>

Thanks to the CHAIN-REDS Project

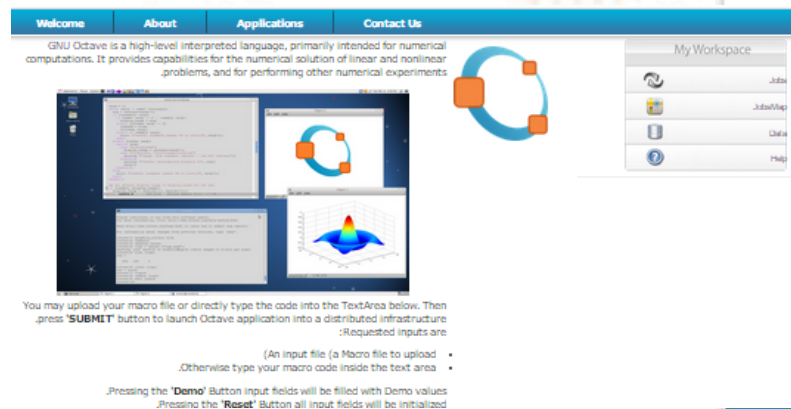

ASREN, TERENA, DANTE in in cooperation of Arab NRENs started to work on Pan Arab Federation of Identities Infrastructure.

ASREN Science Gateway

ASREN SGW provides a set of tools, applications, and data that is integrated via a portal with graphical user interface, that is further customized to meet the needs of a specific community.

Thanks to the CHAIN-REDS Project

3. Proxy request

4. Proxy transfer

5. Grid Interactions

SOME OF THE APPLICATIONS AVAILABLE

COMPUTER SCIENCE AND MATHEMATICS

Sonification

Sonification is the use of non-speech audio to convey information or perceptualise data. Auditory perception has advantages in temporal, amplitude, and frequency resolution that open possibilities as an alternative or complement to visualization techniques.

Octave2

Octave is a high-level interpreted language, primarily intended for numerical computations. It provides capabilities for the numerical solution of linear and nonlinear problems, and for performing other numerical experiments.

R

R is a language and environment for statistical computing and graphics.

HIGH-ENERGY PHYSICS

BESIII

The BESIII experiment is to study basic elements made of matter, interaction among elements and matter, basic rules of particles, etc.

LIFE SCIENCES

GROMACS

GROMACS is a versatile package to perform molecular dynamics, i.e. simulate the Newtonian equations of motion for systems with hundreds to millions of particles.

OTHERS

ASTRA

The ASTRA project aims at reconstructing the sound or timbre of ancient instruments (not existing anymore) using archaeological data as fragments from excavations, written descriptions, pictures, etc. (www.astraproject.org)

Other SGW

Morocco and Algeria

The screenshot shows the homepage of the Algerian Research Network (ARN) Science Gateway. The header features the ARN logo and navigation links: Home, Applications, DZ e-Science Grid, About, and My Data. The main content area welcomes users to the DZ e-Science GRID Science Gateway and describes it as a computational web portal for scientific simulations, data analysis, and visualization. It also mentions that the gateway allows for the rapid deployment of scientific applications as web services. The footer includes logos for ARN, ASREN (Arab States Research and Education Network), chain reds, and a stylized 'A' logo.

Algerian Research Network

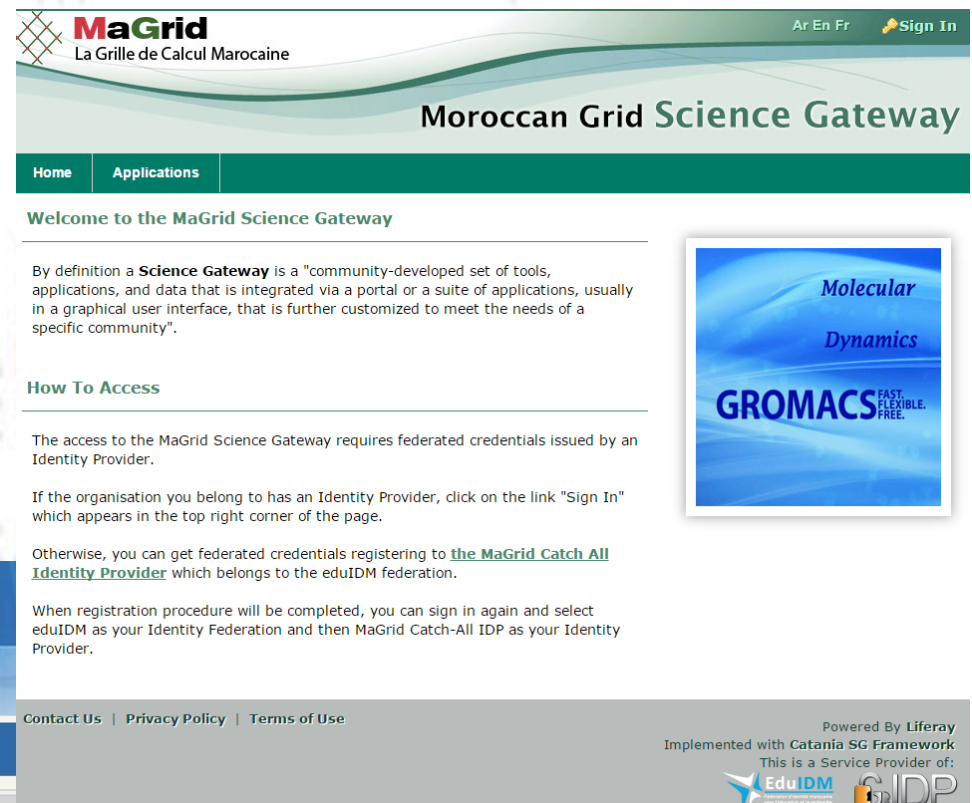

Home Applications DZ e-Science Grid About My Data

Welcome to DZ e-Science GRID Science Gateway

DZ e-Science GRID Science Gateway is a computational web portal that enables scientists to run scientific simulations, data analysis, and visualization through their web browsers.

A science gateway on DZ e-Science Grid is how to deploy scientific applications rapidly on computational resources and expose these applications as web services to scientists.

ARN Arab States Research and Education Network chain reds

The screenshot shows the homepage of the Moroccan Grid Science Gateway (MaGrid). The header includes the MaGrid logo, the text 'La Grille de Calcul Marocaine', and navigation links: Home, Applications, and Sign In. The main content area welcomes users to the MaGrid Science Gateway and defines a Science Gateway as a community-developed set of tools, applications, and data integrated via a portal. It provides instructions on how to access the gateway, mentioning federated credentials and the MaGrid Catch All Identity Provider. A sidebar on the right features a GROMACS logo with the text 'Molecular Dynamics' and 'FAST. FLEXIBLE. FREE.'. The footer includes links for Contact Us, Privacy Policy, and Terms of Use, and mentions that the gateway is powered by Liferay and implemented with the Catania SG Framework.

MaGrid
La Grille de Calcul Marocaine

Moroccan Grid Science Gateway

Home Applications

Welcome to the MaGrid Science Gateway

By definition a **Science Gateway** is a "community-developed set of tools, applications, and data that is integrated via a portal or a suite of applications, usually in a graphical user interface, that is further customized to meet the needs of a specific community".

How To Access

The access to the MaGrid Science Gateway requires federated credentials issued by an Identity Provider.

If the organisation you belong to has an Identity Provider, click on the link "Sign In" which appears in the top right corner of the page.

Otherwise, you can get federated credentials registering to [the MaGrid Catch All Identity Provider](#) which belongs to the eduIDM federation.

When registration procedure will be completed, you can sign in again and select eduIDM as your Identity Federation and then MaGrid Catch-All IDP as your Identity Provider.

Magic

Middleware for collaborative Applications
and Global virtual Communities

General Objective

The Middleware for collaborative Applications and Global virtual Communities (MAGIC) Project seeks to establish a set of agreements for Europe, and other participating World Regions, aiming at consolidating and completing the building blocks of middleware necessary for the establishment of a marketplace of services and real-time applications for international and inter-continental research groups which facilitates mobility and the work of global science communities.

H2020-INFRA-SUPP-2014-2

Magic

Middleware for collaborative Applications
and Global virtual Communities

Specific Objectives

- To foster the deployment of the platforms that **enable mobility of people and seamless access to services** by promoting the establishment of identity federations connected to eduGAIN, creating awareness of privacy and security issues and spreading eduroam.
- To develop a **Model for the provision of services between NRENs** of participating World Regions based on **Cloud Provisioning that takes advantage of applications developed and run by NRENs** across different continents to create a model for a worldwide application market for collaboration tools and services.
- To seek consensus among participating World regions on the importance of **interoperability of Real Time Applications** and work towards the adoption of standards to promote the creation of a worldwide environment for these applications.
- To foster the collaborative work of **Global Science Communities** by actively promoting the participation of Latin American and other regions' researchers in European Commission Calls
